

## **Planning Logic – Import Dataset Using Transformer Spreadsheet**

**A Sprint** fixed period or duration in which a team works to complete a set of tasks

An **Epic** is a **big task or project** that is too large to complete in one sprint. It is broken down into **smaller tasks (stories)** that can be completed over multiple sprints.

A **Story** is a small task . It is part of an **Epic**.

A **Story Point** is a number that represents how much effort a story takes to complete. (usually in form of Fibonacci series)

- 1- Very Easy task
- 2- Normal task
- 3- Moderate task
- 5- Difficult task

### **Storypoint -5 (1,2,3,5)**

#### **Sprint 1**

Data Import (Epic 1)

Selecting Dataset (USN1) – 2

Importing Dataset (USN2) – 1

Data Preparation (Epic 2)

Handling Missing Values (USN3) – 3

Removing Duplicate Data (USN4) – 3

Handling Inconsistent Data (USN5) – 3

**Total Story Point in Sprint 1 = 2 + 1 + 3 + 3 + 3 = 12**

#### **Sprint 2**

Data Transformation (Epic 3)

Filtering Data (USN6) – 2

Sorting Data (USN7) – 2

Formatting Data (USN8) – 2

Creating/Modifying Fields (USN9) – 3

Dataset Output (Epic 4)

Previewing Transformed Dataset (USN10) – 5

Exporting Transformed Dataset (USN11) – 5

**Total Story Point in Sprint 2 = 2 + 2 + 2 + 3 + 5 + 5 = 19**

**Total Story Points**

Sprint 1 = 12

Sprint 2 = 19

Total Story Points =  $12 + 19 = 31$

No. of Sprints = 2

**Velocity**

Velocity = Total Story Points Completed / Number of Sprints

Velocity =  $31 / 2$

Velocity = 15.5 Story Points per Sprint

**Our team's velocity is 15.5 Story Points per Sprint.**
