Empathize & Discover

Date	30 September 2026
Team ID	SWTID-2026-4540
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

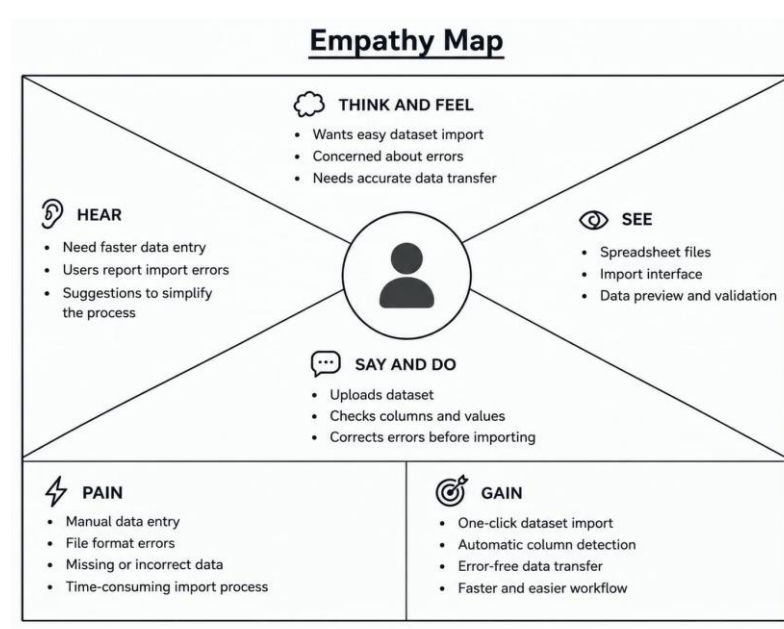

Empathy Map Canvas:

An empathy map is a simple, easy-to-understand visual tool that captures the user's behaviours, thoughts, feelings, and experiences while importing a dataset using Transformer Spreadsheet.

It is a useful tool to help the team better understand the users who face difficulties during the dataset import process. Creating an effective solution requires understanding the actual problems users experience, such as manual data entry, file-format errors, missing or incorrect data, and time-consuming import processes.

The exercise of creating this map helps participants look at the problem from the user's perspective, along with their needs, goals, difficulties, and expectations. This understanding helps the team design a solution that makes dataset importing faster, easier, accurate, and user-friendly.

Example:

Example: Import Dataset Using Transformer Spreadsheet
