

**Project Design Phase
Proposed Solution Template**

Date	30 September 2026
Team ID	SWTID-2026-4540
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	The organization needs to import data from an external spreadsheet into ServiceNow using a Transform Map in order to correctly map the fields, validate the data and load it into the target table without manual entry.
2.	Idea / Solution description	Create an Import Set, configure a Transform Map to map the spreadsheet columns to ServiceNow target table fields, run the transform to load the data and verify the records in the target table.
3.	Novelty / Uniqueness	Uses Transform Map for automated and accurate data mapping, reduces manual effort, and ensures data consistency and validation before loading.
4.	Social Impact / Customer Satisfaction	Saves time, minimizes human errors, improves data quality and provides accurate information to end users, leading to better decision making and improved service delivery.
5.	Business Model (Revenue Model)	Can be used internally for process efficiency and can also be offered as a value-added service (data import/management) for clients or other departments.
6.	Scalability of the Solution	Can handle large volumes of data by scheduling imports, can be extended to multiple source files and different target tables, and supports future enhancements like error handling, notifications and automation.
